## Annie Finds The Moon

---

"Where is the moon? Where IS it?" wondered Annie. She looked out of her bedroom window and stared hard at the sky. She couldn't see the moon anywhere. "May be the moon has been devoured by a starving dragon", she thought.

A few days went by. Annie looked out of her window again. She sighted

the moon this time but it was very thinly sliced shape. She watched the moon for a while in utter disbelief. "Oh! Why is it hiding away? I really love to see it but where has it disappeared?"

Another few days went by. Annie had forgotten all about it. One evening, she was returning to her home from the park, she noticed something gleaming in the dark. She raised her head, and there it was. A full moon sparkling with all its glory!
